Also, within Garageband on the track that I am attempting to record to I've set the monitor to 'On' and have tried selecting all of the different inputs (Ch 1 Mono, Ch 2 Mono and Ch 1 & 2 Stereo).. I've attached several different microphones (none of which require phantom power) and none get any signal into the real instrument track that I've created.. 1, 2ch 16 bit (it won't let me select a mono format, and directly underneath where it has the volume sliders 'M', '1' and '2', the 'M' slider is greyed out).. I've read a similar post about this problem on this site and tried the recommendations, but they didn't seem to work.. Here's what I've done: In 'System Preferences', under 'Sound --> Input' I've selected 'Line In' as my device for audio input (as opposed to 'Internal Microphone') and turned the input volume all the way up..
